The Andersons

Humic DG

DISPERSING HUMIC ACID GRANULES

- Humate may increase plant quality and production
- Easy to apply spherical, uniform, low dust formulation
- Can be blended with fertilizers or used alone
- Self incorporates with irrigation or rainfall

CONTAINS NON-PLANT FOOD INGREDIENT

ACTIVE INGREDIENT

Humic Acid 62%

Derived from Leonardite

FDSE

Potash Sampling

Information regarding the contents and levels of metals in this product is available on the internet at http://www.aapfcontrol.org/

GENERAL INFORMATION

Humic DG is a uniform granule which utilizes The Andersons proprietary dispersible granule (DG) technology. Each granule will disperse into thousands of particles with irrigation or rainfall, facilitating incorporation of the product into the soil. The hard granule has a low moisture and dust content, making it to be easily blended with other components, such as urea-based fertilizers.

Users and products, such as Humic DG, have demonstrated increased plant quality and production when employing and maintaining regulated soils.

DIRECTIONS FOR USE

Apply as directed or as stated by your Andersons representative or local agronomist. Some situations may require use rates and/or more frequent applications to produce significant benefits.

To start roots, water smoothly a minimum of 0.3 inches of water. Product will self-incorporate into dry soil over time. Cold weather and/or cold water (lower than 45ºF / 7ºC) can result in slower self-incorporation.

Humic DG can be applied to all crops, including vegetable crops, row crops, herbs and food crops, trees, shrubs, vines, turf, ornamentals, nursery, landscaping, garden landscaping and potting soils.

CROPS (BROADCAST) - Apply at 40 pounds per acre or higher as a broadcast treatment, one to two times annually. Best when applied in fall, post-harvest, or early spring. May be used at pre-plant up to first blossom or anytime fertilizer is applied. For specialty orchard-focused uses, apply 80-200 pounds per acre.

CROPS (IN-FURROW/BANDED) - Apply 4 - 10 pounds per acre in furrow or as a banded treatment.

TURF - Apply 80-200 pounds per acre per year. Apply 1-2 lbs. per 1,000 sq. ft. anytime during the growing season. Can be applied after aeration as a top-dress treatment. If desired, mix with fine soil media. Apply and water in for self incorporation. Make additional applications as needed.

TREES, SHRUBS - Apply 2-8 oz. as a band around the base of each plant. Larger trees and shrubs should use the higher rate.

ORNAMENTALS AND BEDDING PLANTS - Apply 1-3 pounds per 1,000 sq. ft. as a broadcast treatment to ornamental landscaping and garden areas.

POTTING SOILS - Mix 2-10 lbs. per cubic yard of potting mix.

WARRANTY DISCLAIMER AND LIMITATION OF LIABILITY

Manufacturer warrants that this product conforms to the chemical description on the label and is reasonably fit for the purposes stated on the label when used in accordance with the DIRECTIONS. Manufacturer makes NO OTHER EXPRESS OR IMPLIED WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. To the extent consistent with applicable law, the Manufacturer's exclusive liability and Manufacturer's entire obligation is limited to, at Manufacturer's election, the REPLACEMENT OF, REFUND OF THE PURCHASE PRICE OF, OR ECONOMIC DAMAGES to refund of purchase price or replacement of product, at Buyer's choice. To the extent consistent with applicable law, Manufacturer SHALL NOT BE LIABLE FOR COMPENSATORY OR OTHER DAMAGES ARISING OUT OF ANY USE CONTRARY TO LABEL DIRECTIONS. Use contrary to label directions is not permitted.

THIS LIMITED WARRANTY GIVES YOU SPECIFIC LEGAL RIGHTS. YOU MAY HAVE OTHER RIGHTS THAT VARY FROM STATE/JURISDICTION TO STATE/JURISDICTION.

Suggested Spreader Settings

These suggested spreader settings are intended to assist operators. Always calibrate your spreader prior to applying product.

40 lbs. Seeds 40,000 sq. ft. (0.92 acres) at the 1.5M Rate
40 lbs. Seeds 80,000 sq. ft. (1.84 acres) at the 3M Rate
40 lbs. Seeds 14,000 sq. ft. (0.33 acres) at the 500K Rate

SPREADER	GROUND SPEED	SWATH IN FEET/METERS	SPREADER SETTINGS
